

Joseph Turner Barn

This barn was built for Joseph Turner a number of years (not known when) ago. Later it was sold to Calvin Probst, along with the home and other sheds. Calvin has used it for hay storage for his dairy operation, even to the present.

During the time Calvin has owned it, he had Amos Mecham come and change the roof line, so that the drainage of the rain and snow would be away from the corral, so as to prevent a muddy corral as it had been heretofore.

This barn is located back in the lot, at 3290 W 3500 S in Charleston, and continues to be used for hay storage.
